Experience

University of Houston - College of Medicine, Houston, TX

Application Developer / Graphic Designer Contractor, 01/2020 - Present

Currently working in conjunction with the IT Director and the Marketing Director to create innovative solutions during the development and formation period of the college.

- Assisting in the development and incorporation of new technologies in order to meet the college's current and future needs.
- Effectively delivering standard web and printed templates to be used by staff and faculty.
- Accurately coordinating with the UH Marketing team to ensure adherence to the institution branding policies on all designs.

San Jose Clinic, Houston, TX

IT Specialist II, 03/2019 - 08/2019

Cooperatively worked with the IT Director to support, maintain, and develop the technology infrastructure of the clinic.

- Achieved a promotion as a result of excellent performance, ability to handle diverse responsibilities, and continuous learning.
- My performance was deemed critical in recognizing the IT department as the best department of the year 2019.
- Ensured efficiency of network infrastructure by actively supporting LAN/WAN components.

IT Specialist, 06/2016 - 03/2019

- Actively performed all levels of technical support for 80 computers, 30 printers and 90 users.
- Recognized for offering high-level customer service by being awarded Employee of the Month on 11/2016.

Historian's Office of Havana, Havana, Cuba

Network / System Administrator, 01/2010 - 08/2015

Performed a wide range of network and system administration duties in the network infrastructure.

- Successfully led the IT department as Interim Manager for three months by creating a supportive work environment.
- Played a crucial role in the network infrastructure upgrade undertaken in the organization by helping to map devices on the network and their physical connectivity.

Military Academy, Havana, Cuba

Intranet Webmaster, 08/2006 - 11/2009

Carried out the regular maintenance and development of the Academy website.

- Transformed UI wireframes and mockups into interactive features, using HTML, CSS and JavaScript.
- Significantly improved the web performance by applying solutions such as cross-browser compatibility, basic SEO and W3C validation.
- Helped to achieve a consistent look across the website by promoting uniform fonts, images, and layout.
- Successfully identified, diagnosed, and fixed website problems, including broken links, typographical errors, and formatting issues.
